

No. Soal

1. Create API Ecommerce Ketika checkout, dengan kondisi mempunyai voucher 50% dan harga barang Rp.5000.000, dan Ketika menggunakan voucher akan mendapatkan point sebesar 2% dari voucher yang digunakan.
2. Create API Auth tapi harus Oauth dengan menggunakan Cookie dan jwt, dengan context  
{  
  id :uuidv4,  
  Username : bebas harus unique,  
  Session\_exp/iat : bawaan jwt,  
}

3. Buat lah syntax user dengan dibawah berelasi dengan table company

Dengan data :

User :

| Id              | Nama       | Email                                              | telp         |
|-----------------|------------|----------------------------------------------------|--------------|
| Uuidv4(12qwer)  | Imron      |                                                    | 081234567890 |
| Uuidv4(321rewq) | Juli       | <a href="mailto:Sammy@mail.com">Sammy@mail.com</a> | 0987654321   |
|                 | Gajah Mada |                                                    |              |

Company :

| Id                 | User_id | Company_code | Company_name |
|--------------------|---------|--------------|--------------|
| Uuidv4(trew098)    | 12qwer  | SPI          |              |
|                    |         |              | Samudera     |
| Uuidv4(poiuyt1234) | 321rewq | PIC          | Samudera     |

dengan hasil akhir :

| User_id | Company_id | Nama  | Email                                              | Telp         | Company_code | Company_name |
|---------|------------|-------|----------------------------------------------------|--------------|--------------|--------------|
| 12qwer  | trew098    | Imron | null                                               | 081234567890 | SPI          | null         |
| 321rewq | poiuyt1234 | Juli  | <a href="mailto:Sammy@mail.com">Sammy@mail.com</a> | 0987654321   | PIC          | Samudera     |

- 4 - manipulate api <https://randomuser.me/api?results=10&page=1> dinamis untuk  
manipulatenya dimana results dan page bisa diubah

```

- Dari response yang sudah dimanipulasi diatas, buatlah tampilan menggunakan react/next/nuxt/vue tetapi dalam ts dan library andt Seperti pada gambar diatas dan search harus berjalan

- Manipulate array

["merah","kuning","hijau","pink","ungu"]

["baju","celana","topi","jaket","sepatu"]

["Diskon","Sale","Diskon","Sale","Sale"] menjadi

["Baju Merah Diskon", "Celana hijau Sale", "topi kuning diskon ", "jaket ungu sale", "sepatu pink sale" ] dengan array dinamis dimana jika ditambahkan kondisi seperti

["merah","kuning","hijau","pink","ungu","maroon"] menjadi

["Baju Merah Diskon", "Celana hijau Sale", "topi kuning diskon ", "jaket ungu sale", "sepatu pink sale", "Baju Maroon Diskon" ]
